

WEB PROGRAMMING AND APPLICATIONS

(503073)

WEEK 8

Prepared by Mai Van Manh

Exercise: Create a website that connects to the MySQL database to perform the following features:

- **Account Management**
 1. Create a new account.
 2. Activate user account via email url after signing up.
 3. User login.
 4. Recover passwords via email.
- **Product Management**
 - Display product list.
 - Add a new product with image upload.
 - Update product information.
 - Delete a product with confirm dialog.

Instructions:

- Use 'lab08.sql' for database structure and sample data.
- Take some time to read and test the source files provided in the 'code' directory before starting the exercise.
- You should use the libraries for this exercise. For example, using PHPMailer to send email, using Composer to manage external libraries.
